"Your mowers were a big part of our success with the PGA Championship last August... We mowed our collar and fairway tie ins with them at 0.250" height of cut. They went out both morning and evening all seven days during the championship."

-Keith Wood, Superintendent,
Quail Hollow Club, Charlotte, NC

Streamsong
Pebble Beach
The Vineyard Club
and more...

"Mine is like 18 years old and always worked great. I built a putting green for my son and the Hudson Star has been great. My youngest is in the PGA program now so it was a good investment."

- Nick Baltusevich, Greens Owner

"With my old mower I couldn't cut down to 3/8." I can now cut down to 1/8" and it's so easy to adjust."

- Lowell R., Greens Owner

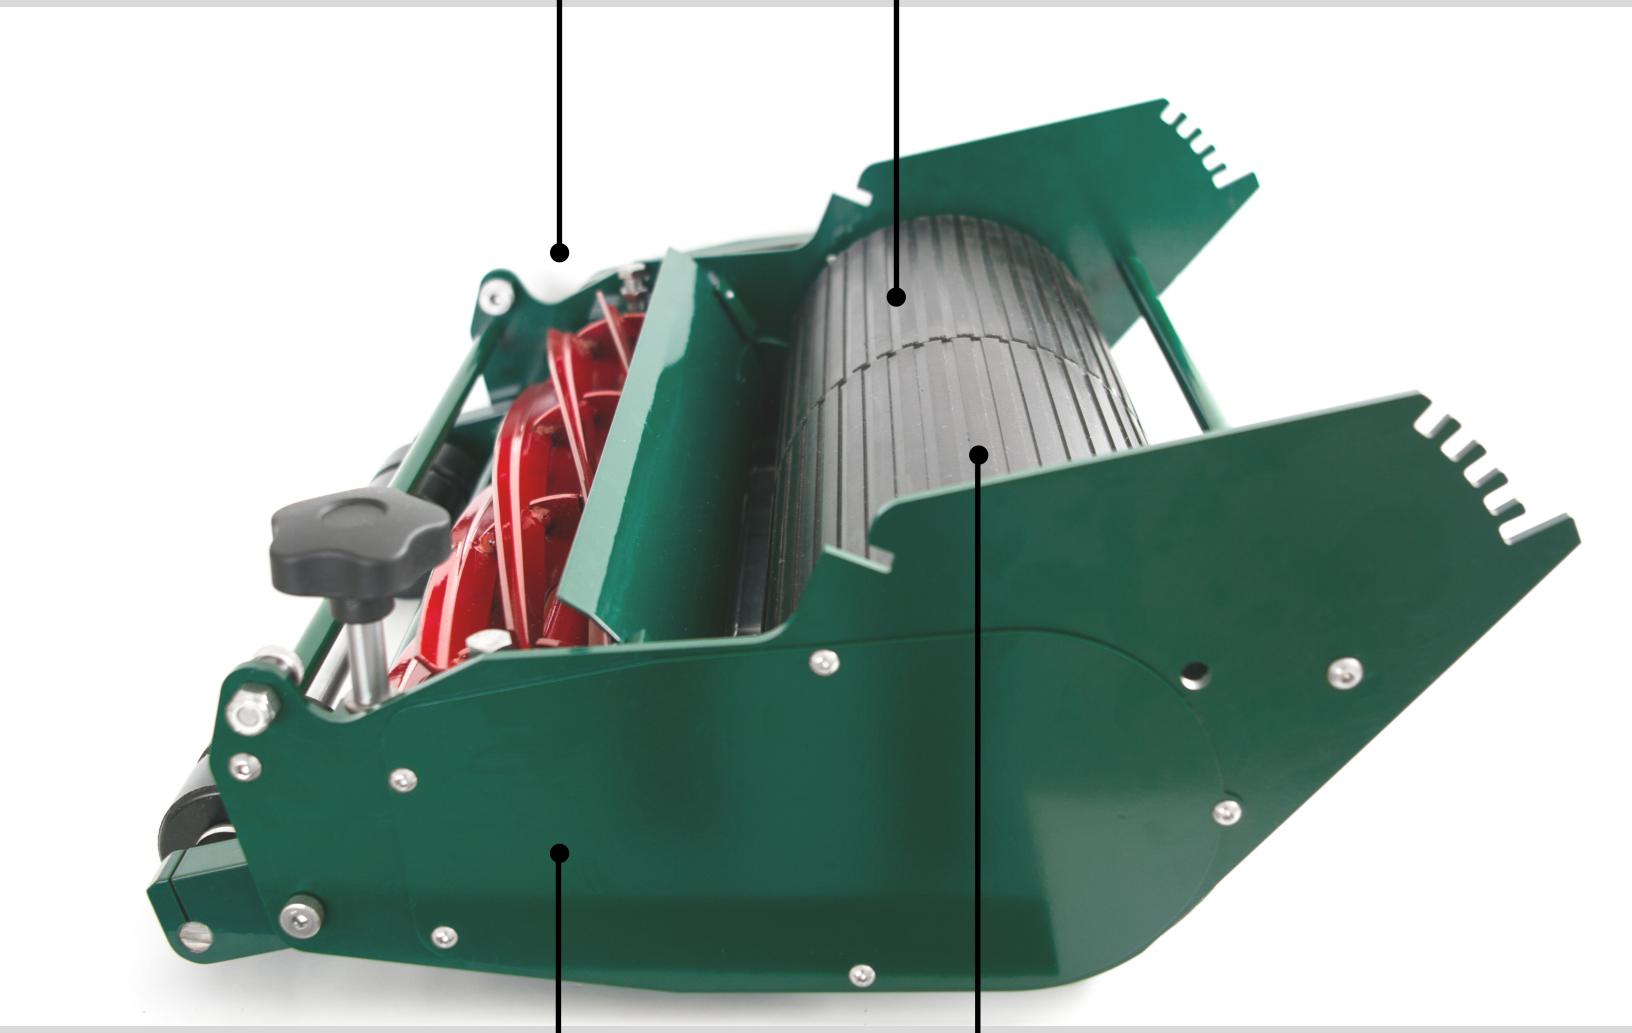
Questions? 317-402-4668 , Sales@HudsonStar.com

PROFESSIONAL CUT & PRECISION

With an 11 blade reel and professional bed knife, it produces a perfectly manicured cut. Clippings found in the grass catcher can often be a powder.

MINIMUM TURF IMPACT

Equipped with lightweight urethane rollers and at only 82 lbs, it is easy to push and easy to cut. Better weight distribution makes rollers superior over wheels so there is no gouging or tracks left in the turf.



NO SCALPING

Special Clutch Bearings inside the rollers prevent drag and eliminate chances of scalping or scarring.

SHARPEN YOURSELF

Remove the gear cover and attach the backlapping crank to sharpen by hand. Or attach into any sharpening machine. Either method, the blades can cut paper and pass the Paper Test that golf courses use.

HUDSON STAR GREENS MOWERS

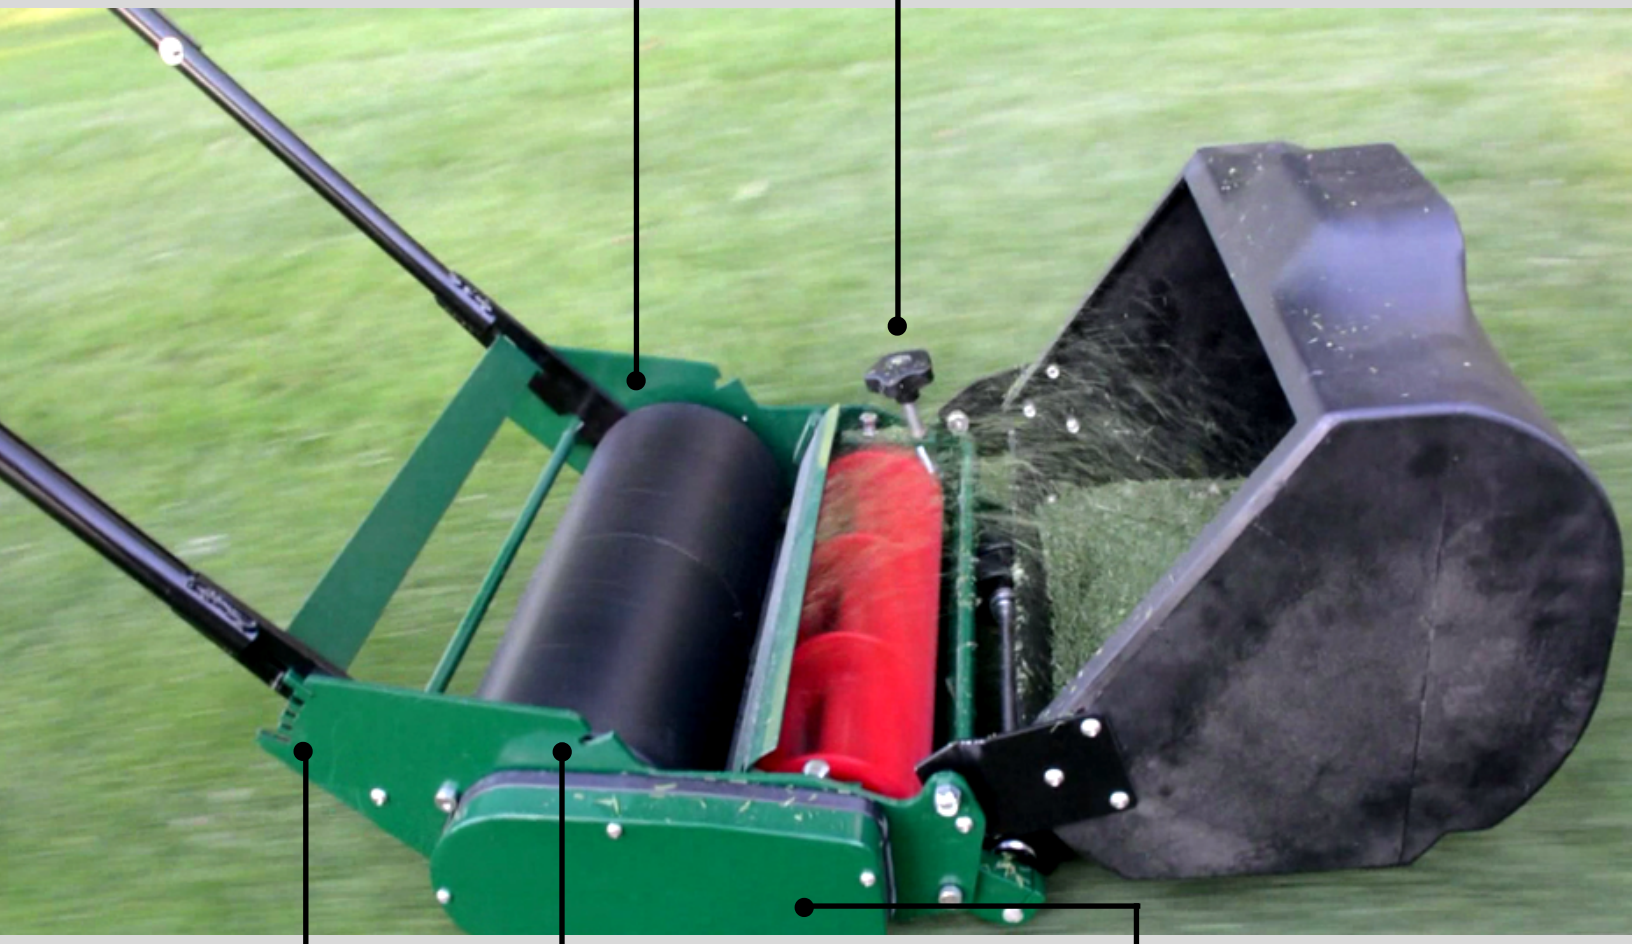
TPC and PGA Precision
Since 1997

PROFESSIONAL CONSTRUCTION

All steel frame and professionally powder coated, it is engineered for superior durability and ruggedness.

SINGLE POINT HEIGHT ADJUSTMENT

Precision adjustment with a single rotating knob. Adjustment to your fringe height is a matter of seconds.



ADJUSTABLE HANDLEBARS

Professionally coated steel handlebars are easy to adjust into 5 positions for maneuverability and ideal operator height.

HUDSON STAR GREENS MOWERS

TPC and PGA Precision Since 1997

TRANSPORT MODE

Handlebars easily lock into Transport Mode for minimal impact to the bed knife and reel setup.

MAXIMUM PROTECTION

Gears and bearings are guarded by an all steel housing with a rubber seal to diminish water, sand, and grass clippings from entering the mower.

MINIMAL MAINTENANCE:

No fuel, oil, filters, electrical components, hydraulic components or engine components. Save time and money with less troubleshooting and replacement parts. All parts can be easily ordered direct at www.hudsonstarshop.com.

EASIEST PRECISION ADJUSTMENT:

With a single knob to adjust the height there is no nuts, bolts, or tools required for your fringe/collar height. Adjusting the height up or down takes seconds. Hudson Star is the only greens mower with a single knob adjustment.

NO SCALPING OR SCARRING:

The special clutch bearings inside the rollers prevent drag and eliminate scalping. Additionally, the lightweight and narrow design is excellent for uneven turf and undulations. Owners love how how gentle it is on their green while maintaining a professional, manicured cut.

SHARPEN YOURSELF

There is no need for reel disassembly, shipping the mower to the manufacturer, or locating a reel sharpener in your area. These services frequently cost $80-$120. A backlapping crank is provided with every mower so no machine is required.
Typical greens owners sharpen 1-3 times/year to keep a great cut, although it varies based on green size, cut frequency, grass thickness etc.

PROFESSIONAL CUT & PRECISION:

Many top tier golf courses use the mowers like Quail Hollow, Streamsong, TPC River Highlands, TPC Boston, and many more. You can get your backyard green down to the height of any professional golf course or country club.
